Sebastián Niño

Junior Full-Stack Developer (Backend focus)
Bogotá, Colombia | Open to remote or hybrid | Spanish (native), English (C1) | hello@sebastiannino.me
Portfolio: sebastiannino.me | GitHub: github.com/sebashooo | LinkedIn

SUMMARY

Systems Engineering student (8th semester) and junior full-stack developer with a backend focus. I build and ship real SaaS products end to end, from data modeling and multi-tenant security to automated testing, CI/CD and deployment. My work includes a production PWA used in my own business and a team backend with hundreds of end-to-end tests. I have 2+ years of experience supporting US customers in English (C1), which makes me comfortable communicating with international teams. I use AI tools such as Claude Code in my workflow, always reviewing and testing what they produce. Seeking a junior full-stack, backend, data or cloud role, remote or hybrid in Bogotá.

TECHNICAL SKILLS

- Languages: TypeScript, JavaScript, Python, SQL
- Frontend: React, Next.js, Tailwind CSS
- Backend: Node.js, NestJS, REST APIs, OAuth/2FA, RBAC
- Data & Cloud: PostgreSQL, Prisma, Row Level Security, GitHub Actions (CI/CD), Vercel, AWS fundamentals
- Testing: Vitest, Jest, Supertest (E2E)

PROJECTS

Managerapp — Founder & Full-Stack Developer Sep 2026 – Present

Next.js, TypeScript, React, Tailwind, PostgreSQL (Neon), Prisma, Better Auth, Vercel

- Built a multi-tenant installable PWA for small businesses: POS, catalog, multi-location inventory and PDF quotes; used in production in my own business.
- Enforced per-tenant data isolation with PostgreSQL Row Level Security and a CI guard that fails the build on unsafe database roles.
- Designed the Prisma data model (exact decimals for money, auditable inventory log); Google OAuth with 2FA and role/location-based access.
- Set up CI/CD: Vitest tests on GitHub Actions and automatic deploys to Vercel on every push.

Tu Conjunto a la Mano — Backend & Database Developer 2026 · Team project

NestJS, TypeScript, PostgreSQL, Prisma, React, Swagger

- Designed the backend and PostgreSQL data model (versioned migrations) for a platform that digitizes gatehouse and admin operations in residential complexes.
- Implemented multi-tenant architecture, 5-role access control, secure cookie sessions, login lockout and hashed passwords, aligned with Colombia's data protection law (Law 1581).
- Wrote hundreds of automated E2E tests (Jest, Supertest), including a route-by-route tenant-isolation sweep; documented the API with Swagger; deployed on Render, Neon and Vercel.

WORK EXPERIENCE

Bilingual Customer Service Representative — Foundever (Affirm account) Aug 2026 – Present

- Support US customers in English on account and payment cases for a buy-now-pay-later fintech, following compliance guidelines and a Salesforce knowledge base.

Customer Service Associate — Amazon Jun 2024 – Jun 2026

- Resolved account and order issues for retail and corporate US customers by phone and chat in a high-volume environment, escalating incidents and meeting performance targets.

EDUCATION

B.S. Systems Engineering — UNIMINUTO Expected Dec 2027

Cybersecurity Technical Program — SENA In progress

CERTIFICATIONS

- AWS Cloud Practitioner (CLF-C02) — in progress, exam pending
- GitHub Foundations — course completed (DataCamp)
- MongoDB Associate Developer (Node.js) — in progress
